

DSE8680

SYNCHRONISING GENERATOR BUS-TIE CONTROL MODULE

FEATURES

The DSE8680 module is designed to control a generator bus-tie breaker. The module manages the synchronising and check-sync across the breaker automatically, via the DSE MSC (Multi-set Communications) Link, when opening or closing the bus-tie breaker.

With all communication ports capable of being active at the same time, the DSE8680 is ideal for a wide variety of demanding load share applications.

The DSE8680 module has been designed to work with the DSE8x10 and DSE8x60 Load Share control modules which support up to sixteen DSE8680s with no DSE8x60 or up to two DSE8680s with one to fourteen DSE8x60s. This provides a standalone, fully integrated solution, without the need for PLC.
